SOFTWARE AND DATA

- countrycode is a package for R which can be used to convert country codes and country names. Links: Github, CRAN.
- WDI is a package for R which allows users to search and download thousands of panel data series from the World Bank’s World Development Indicators. Links: Github, CRAN.

- Rdatasets is a collection of 680 datasets that were originally distributed alongside the statistical software environment R and some of its add-on packages. The goal is to make these data more broadly accessible for teaching and statistical software development. Each dataset is distributed in comma-separated values format, with detailed html documentation. <http://vincentarelbundock.github.com/Rdatasets>
